Step 1: Clone this repo using "git clone https://github.com/amp1590/Thesis-On-PCANet.git"

Step 2: Go to the code forler using "cd /Thesis-On-PCANet/Code"

Step 3: Open matlab and Change the matlab directory to the project code directory.

Step 4: Open and run "BreastHisto.m" file .

For step 3 follow these images –

Copy this current directory path. For my case, the highlighted text is the directory path.

Paste the copied directory path in matlab path/url field and hit enter.

Now open BreastHisto.m file from left window and run it.
